

Topic Bot

September 22, 2026

Value Proposition

Make learning faster, more fun and so that the information is retained.

Wireframe

Screen 1: Topic Bot Builder

- Powerful computer → Topic Bot is added to catalog
- Teacher adds assets, rules etc.

Screen 2: Topic Catalog

- Search bar: "I am always behind on work"
- Results:
 - How to setup Google Calendar
 - Technique to fight procrastination
 - Podcast on discipline and motivation
- Selecting a topic opens the Topic Bot

Screen 3: Topic Bot

- Title: How to set up Google Calendar
- 1.) Go to this site, do this, this and that (image)
- 2.) Then do this (image)
- 3.) Last it will do this
- Chat: Ask any question for clarification

Retrieval-Augmented Generation (RAG)

How is the data gathered and how does it produce something that is useful to the user?

- Needs to be relevant
- Needs to be digestible to the audience
- Needs to be entertaining, interesting, useful.

Content-Augmented Generation (CAG)

How does the content become useful in helping the LLM come up with a product that is useful?

- Needs to be able to understand what it is looking at.
- Needs to be fast
